

A new era for The Finishing Line

**We have exciting news
for all our customers.**

The Finishing Line is moving to extensive new premises, just a short distance from our existing facility. This means we still offer all the benefits of a strategic location close to local ports and within easy reach of the UK's largest consumer market, but with the added bonus of a modern, sustainable and secure building that will enable us to grow with our customers.

We're sure that you will have some important questions, so we've tried to provide the key points below, but please feel free to contact us for further details – we'll be happy to tell you more!

Andy Mead
**Founder and Managing
Director, Finishing Line**

Why are we moving?

The Finishing Line has continued to grow and diversify in recent years. So, we have been looking for modern, sustainable premises that enable us to bring all our services under one roof, capture synergies and drive efficiencies, while creating a better working environment for our highly valued workforce.

At 76,000 sq ft, with an 11,000 sq. ft mezzanine floor, 6 dock levelling doors, 60,000 sq. ft. of VNA racking and 14,000 pallet spaces, the new building is substantially larger than our current facilities. It will increase production capacity by up to 40%, as well as providing additional storage.

Future opportunities include the potential to introduce additional automation, increase shift patterns and establish a Customs Bonded facility.
